

GATOYA Cyuzuzo Grace

SOFTWARE ENGINEERING STUDENT | DEVOPS | UI/UX Designer

Kigali, Rwanda | +250 791 165 994 | gracegatoya@gmail.com

GitHub: Grace-Cyuzuzo | GitLab: gracegatoya | LinkedIn: Gatoya Grace

TECHNICAL SKILLS

DevOps & Cloud

- Docker & Docker Compose
- Kubernetes (Minikube)
- ArgoCD / GitOps
- GitLab CI/CD
- NGINX / Traefik

Programming Languages

- Java
- Python
- JavaScript (Node.js)
- React
- C
- SQL / Bash

Frameworks

- Spring Boot
- Hibernate ORM
- Swing

Databases

- PostgreSQL

Tools & Platforms

- Git, GitHub, GitLab
- VS Code / IntelliJ

LANGUAGES

- Kinyarwanda — Native
- English — Proficient
- French — Intermediate

SOFT SKILLS

- Problem Solving
- Team Collaboration
- Technical Documentation
- Attention to Detail
- Time Management
- Leadership

CERTIFICATIONS

- Program Management — Humentum
- MEAL Dpro

EDUCATION

Bachelor of Science in Software Engineering

Adventist University of Central Africa (AUCA), Kigali
2024 – Present

PROJECTS

Examination Malpractice Reporting System (NESA)

Java | Spring Boot | PostgreSQL | MVC/DAO | REST API

- Developed a multi-role web application with secure authentication for students, invigilators, and administrators
- Applied MVC/DAO design patterns; produced full UML diagrams documenting system architecture
- Implemented RESTful APIs with Spring Boot and a PostgreSQL backend

TerraTrust - Plot Management System

React | Spring Boot | PostgreSQL

- Built a full-stack web application for managing land plots, including ownership records and how plots relate to each other
- Built a React frontend connected to a Spring Boot REST API, backed by a PostgreSQL database
- Designed a broader entity scope including a self-referencing relationship in the data model

AiVital - Population Health Risk Intelligence System

Python | XGBoost | Random Forest | RBC Collaboration

- Built an AI-based population health risk prediction system in collaboration with the Rwanda Biomedical Centre (RBC)
- Compared XGBoost against Random Forest for risk prediction and selected XGBoost as the core model
- Produced technical documentation comparing model performance and evaluation results
